

Summary

B.Tech graduate in Information Technology with strong foundation in programming, database management, and software development. Proficient in [Python/Java/SQL/web technologies]. Seeking an entry-level role to apply technical and analytical skills in a results-driven environment.

Education

Sagi Ramakrishnam Raju Engineering College	Bhimavaram, India
Bachelor of Technology in Information Technology	AUG 2023 - 2026
• graduated with an 8.46 CGPA.	
A . A . N . M & V . V . R . S . R Polytechnic	Gudlavalleru, India
Diploma in Computer Science and Engineering	Dec 2020 - Jun 2023
• Completed with an excellent A+ grade, securing 91.05% overall.	

Skills Summary

- **Programming Languages** : Python, Java, SQL
- **Frontend Technologies** : HTML, CSS, Basic Javascript
- **Core Concepts** : Object-Oriented Programming (OOP), REST APIs (In Progress)
- **Machine Learning & AI** : Supervised, Unsupervised Learning
- **Tools & Networking** : Postman, git, Jupyter Notebook, VS Code, Cisco Packet Tracer, TCP/IP, Subnetting
- **Databasesv**: MySQL, MongoDB

Projects

- **Car Price Prediction Web APP** | **GitHub** | **Live Link** : Built a machine learning model using Lasso Regression (Scikit-learn) to predict car resale values based on features like year, fuel type, and transmission; deployed the model using Streamlit for real-time, interactive price predictions.
- **Web Application Vulnerability Scanner** | **GitHub** : Developed a Python tool using Flask, Requests, and BeautifulSoup to detect SQL Injection (SQLi) and XSS vulnerabilities through an interactive web interface. Integrated automated payload testing, response analysis, and clear result visualization for efficient web security assessment.
- **File Analyzer** | **GitHub** : Developed a Flask web application that analyzes Excel, PDF, and text files to generate data summaries, missing value heatmaps, and automated PDF reports. Implemented Python-based data processing using Pandas, Matplotlib, and Seaborn with a responsive navy-blue UI for seamless user interaction.

Experience

- **Trainee Team Member**, DBaseSolutions - Eluru JAN 2023-JUN 2023
Successfully finished 6-months internship focused on data management by using SQL and IT operations. Assigned tasks such as verifying bubbled serial numbers in OMR sheets, ensuring data accuracy and integrity. Supported IT operations by assisting in troubleshooting and routine technical tasks.
- **ChatGPT/Generative AI intern**, Blackbuck Engineers - Virtual MAY 2024-JUL 2024
Developed a content-based movie recommendation system using Python that suggests similar movies based on genres, keywords, cast, and director information, employing efficient data preprocessing, feature engineering, and cosine similarity for accurate recommendations.
- **Cybersecurity Intern** CodeTech It Solutions Pvt.Ltd - Virtual JAN 2025-Mar 2025
Developed a Web Vulnerability Scanner using Python to detect SQL Injection and XSS vulnerabilities in web applications. Built a modular Penetration Testing Toolkit with Port Scanning and Brute-Force Attack features for network assessment. Created an AES-256 Encryption Tool with a Flask-based interface for secure file and text encryption/decryption.

Certification

- Python Essentials** | **Cert:-** Proficient in Python fundamentals and problem-solving using the Python Standard Library.
- Juniper Cloud E-Learning** | **Cert :-** Gained hands-on experience with foundational knowledge in cloud networking, covering cloud architecture, virtualization, and deployment models.
- CCNA Introduction To Networks** | **Cert:-** Learned to build and manage core skills in networking concepts, IP addressing, and network configuration.
- Java Programming Fundamentals** | **Cert :-** Completed edX verified course in Java Fundamentals, mastering core syntax, OOP, and problem-solving.
